

HVAC Infrared GH-Series Overview

The RAPID™ GH-Series Residential and Commercial Low-Intensity Infrared Heater

A compact heater, the RAPID™ GH is a factory-assembled unit for residential and light commercial applications. This infrared heater is easy to install and transport since it is factory assembled and shipped in one box. It can be ceiling-mounted to free valuable work space below. The RAPID™ GH U-tube design provides maximum inputs at minimum lengths. With one building penetration (balanced flue for both exhaust and combustion air) it's an economical choice.
