

## Industrial Finishing Custom Washers Overview

RAPID™ Custom Washers are designed and built to help meet or exceed the recommendations or pre-treatment chemical suppliers. They are constructed of high quality materials to extend the equipment life and to help ensure maximum resistance to corrosion. Spray systems are sized to provide optimum flow and pressure while meeting minimum space requirements.

Process applications include: parts cleaning and degreasing, contaminant removal, corrosion prevention and surface preparation. Custom Washers, as with all washers, are available in the Install-It-Yourself option.
