

Industrial Finishing Oven Panels & Trim Packages Features & Benefits

- Standard width of RAPID's™ insulated oven panels is 27-7/8"
- 20 gauge aluminized steel interior and exterior skins, unpainted
- 4 lb. density insulation which is pre-formed, mineral-fiber felt - ideal for oven applications to 500° F
- Self-supporting, formed tongue-and-groove construction
- Galvanized steel headers, slotted to minimize heat transfer
- Panels come banded and skidded for ease of shipping and handling
- **Minimum order: 500 square feet**
- **Standard Delivery: 2-4 weeks for most orders**

Options:

- Custom panel widths and lengths
- Complete trim packages
- Access doors (23" W x 60" H), complete with jamb, hinges, gaskets and explosion-relief latches
- Profile openings and cutouts (Per Custom Drawings)
- 6 and 8 lb density insulation
- 2" thick panels (Unslotted Rails)
- Insulation for joints and corners
